Personal memo from
JOSHUA LEDERBERG

Dr. William O. Baker

OCT 15 1991

How time passes!

Dear Bill –

I realize with a start the how long since we've had a chance to get together. How about lunch when you're nigh?

My lab is going well, and I'd be eager to tell you more detail. And I do have a DARPA grant now for the computer science part of the work.

I'd hoped to "retire" from DSB etc. but keeping nuclear and BW weapons out of the hands of the crazies is too urgent so I'm still on the Washington 'National Security circuit.

Hope you're well.

Yours,

John.
