Personal memo from
JOSHUA LEDERBERG

Sol Barer
Eelgene
2/24/89

Jim Spain at Tyndall AFB

I met him the other day.

Are you still continuing work on Pseudomonas aromatic oxidation?

If so I suggest a synergistic benefit to your mistery him to give a seminar.

He is feeling very isolated and would welcome it. You can use my name; but I've not given him either yours nor the product you're interested in.

AF also sponsors some contract research in the same area.

Yours,

J.L.
