Personal Memo from
JOSHUA LEDERBERG

Prof. Hymowitz
12/10/89

"Kunitz"

I see you're casting him before swine; but in all seriousness I'm sure he'd have been delighted. Thank you — and be sure your letter will be in our archives.

What do you imagine is the "biological function" of the inhibitor?

Sincerely,

Jim Lederberg

P.S. Can you give me a bit more bibliographic history on your development? Is any of the controversy in print?
