VISCONTI

February 1. 1952

Dear Josh.

thank you for your letter of Jan. 23. You can keep the copy I sent you of my paper. In case it had to be published all comments referring to personal matters will be left out. I visited Be Sameter the cytological work is going on but no data on the genetics of B. megatherium are yet available.
Unfortunately I will have no time on my way back to stop at Madison, as I will be going back to Italy at the middle of March. Thank you anyhow.
My best regards to Esther, very sincerely yours

Nic.
