Pasadena, November 6, 1950.

Dear Dr. Lederberg:

I thank you very much for your letter, with all the information on the stocks, and for the forwarding of the stocks. I am awfully sorry that I have to trouble you once more; unfortunately, by an error, the tube K-1033 seems not to have been inoculated; would it be possible to ask you once more to be so kind to send me K-1033; the tube K-1084 was inoculated twice. If you think there might be the possibility that the stock K-1033 was inoculated into this tube together with stock K-1084, I would very much appreciate if you could send me both strains again. Please excuse all the trouble I am causing you.

With many thanks in advance

yours sincerely,

Marguerite Vogt
