Sept 7, 1960

Dear Esther and Josh!

Now, I am staying in Cairo, to see Pyramids, Sphinx, and the city. Nile river is full filled with brown water under bright sun shine. One friend told me that the reason this pyramid has no nose is caused by Napoleon. "He break the nose", but it is hard to believe so. Anyway, he, the Sphinx, still facing to Sun as he has done since 5000 years ago.

With regards. Y. HIROTA
