Personal Memo from
JOSHUA LEDERBERG

Dr B Davis

Dear Bernie

NOV 7 1985

Thank you for yours of 11/1

I certainly joined in spirit the "honoring" of Sept 27.

I have dug up all the other references about auxanography + bioautography. Perhaps you told me verbally about some piece of that.

What fun about the aminoglycoside actions on ribosomes!

You may recall we ran into an early glimmer on that with Sm acting as a suppressor with Sm^D. Doubtless that's why you shared the anecdote.

Yours,

Jim.
