Memo/Reply From
JOSHUA LEDERBERG

TO: DC Gazis

Technology ↔ Science

Thank you for an enjoyable reprint. I have been urging a rediscovery of a similar theme in health research policy. The "process-phase model" is plainly wrong; but there has been insufficient metaanalysis to offer a studied alternative.

You might be interested to see Beecher, HK "Disease and the Advancement of Basic Science." Harvard, 1960. Even that only barely touches on Avery/DNA which may be the most seminal example.

Sincerely

Joshua Lederberg
