JAMES GERMAN, M. D., *Human Genetics*

THE ROCKEFELLER UNIVERSITY
JUN 17 1980
OFFICE OF THE PRESIDENT

6.12.80

Dear Jack:

I was pleased to have your reappointment to adjunct faculty letter. But, I really wish I could do more — make it more meaningful. I do of course interact w/ students, & several collaborative studies are going.

Isn't there some human genetics we can get going there. I'd really like that, & maybe we should just talk about it some time. It would be nice to see you sometime when not on the "run."

Jester Rose has done a good job as my lab's secretary. We'll miss him. (Are you importing any more lab secretaries for me?!)

Kind regards & best wishes.

Jim G.
