United States Senate

WASHINGTON, D.C. 20510

January 8, 1971

Dr. Joshua Lederberg
Department of Genetics
Stanford University Medical School
Palo Alto, California 94304

Dear Dr. Lederberg:

In haste, I want to thank you very much for taking time to forward the package of materials I received from you this past week. They were all timely, and have been included in the preparation for Meet the Press this Sunday.

As important as this was, we are even more interested in staying in touch in the future, and I hope you will feel free to drop a line whenever you think it appropriate.

Very truly yours,

Dave

DAVID A. CATHCART

TUNNEY, JOHN

Dear Mr. Neidle--

In the event you happen to see this program, and Senator Tunney does emphasize the reconversion of Ft. Detrick, I should tell you that I had sent him a statement long prior to, and quite independent of your recent query to me. I would do my best to minimize cross-currents among different approaches, and wished to reassure you of my sensitivity to possible difficulties.
