Dear Josh,

- (1) Many thanks for sending me a copy of Merton's book. I've not yet had time to browse in it, but I'm looking forward to an early opportunity to do so.
- (2) I have made a very preliminary search for information re. interclonal influences in bacteria, so far wholly unsuccessful. But I'll keep on thinking about your questions and let you know if anything turns up. There still are many potential sources I've not yet consulted.

Best wishes,

K. N.
