

December 10, 1946

Professor E. L. Tatum  
Department of Botany  
Yale University  
New Haven, Connecticut

Dear Ed:

I am enclosing a copy of a letter from Woods, part of which refers to p-AB mutants. I have referred the adenine aspects of the letter to Mitchell. I have indicated to Woods that you have taken over the p-AB mutants and that you will answer his letter and send him any mutants that you care to let him have.

Things are getting pretty well settled down here and it looks like maybe we would get some good results one of these days. I will tell you all about our progress when I come east during Christmas vacation.

With best regards to all, I am

Sincerely yours,

G. W. Beadle
