Personal memo from
JOSHUA LEDERBERG

Dr. Gregory Benford

7-5-94

(DNA) conservations

Thank you for advising me about your Oct-Nov '94 workshop.

Sorry, I won't be able to attend.

I trust you are in touch with Luca Cavalli-Sforza at Stanford who has cognate aims for human population isolates.

You may also want to contact Bill Conway of the NY (Bronx) Zoo who has very thoughtful views about eco-triage as well as the use of the best new technology.

And I burden you with some ancient writings of my own.

Sincerely,

Please keep me advised.
