Dear Sir:

Enclosed is a copy of my senior thesis in Biology at M.I.T. It summarizes the work accomplished to date on my project in behavioral genetics of Drosophila. The experimentation spanned a period from early June to late December, 1974. During the summer, I was a paid research assistant funded by Dr. Hall and U.R.O.P. During the autumn semestery however, the project was continued for academic credit as course 7.90, Special Problems in Biology for Undergraduates.

I hope you enjoy reading the paper. Thank you for your consideration.

Respectfully,
Jerald Feitelson

applicants

P.S. My new transcript, incorporating Fall '74 grades, is on its way.

FEB 14 1975

I am delighted to have this, having a special interest in your application.
Would you be interested in attempting to DENDRALize some aspect of genetic research e.g. to mechanize the abduction of experimental efforts at falsification of hypotheses?
