To S.U. Archives
ACME project.

This is a remarkably complete set of files about an important milestone in the development of computers at Stanford. It also tells a lot about university - NIH relations!

I have weeded much of the obvious duplication.

The "final report" 1973 probably should be scanned first. It includes

PRO BONO HUMANI GENERIS

an index to the technical notes.

Still at Stanford, Gio Wiederhold is the most knowledgeable about ACME.

Ron Jantzaard has, I believe, moved to Oregon or Washington State. SCIP may have some relevant files.

My personal files may have a scatter of other material. These have been moved to Rockefeller University and will be archived there.

The successor to ALME was the DENDRAL + SUMEX projects.

Prof. Feigenbaum should be watching over the files of these activities now. (More immediately, Tom Rindfleisch and Carole Thillie at the SUMEX office.
