

Dear Gus:

Herewith a somewhat mutilated copy of the program I have just submitted on our behalf for support from the NIH. Whatever you find objectionable you can of course attribute to me. There is nothing you need do on it; whole business is essentially a (time-consuming!) formality. Phyllis Rowntree is here and as she will be returning soon I have as to bring you the culture we have had so much trouble in sending you. be too startled at the taxonomy of the label.

Independently of this I suggest you apply to Canberra for an import permit for a shipment which I may make by mail in case Phyllis has any with customs at Sydney. She should be home in about two weeks-- do con in a reasonable time whether you have any luck.

or have you done this before?

Yours
Joshua Lederberg
