Memo from JOSHUA LEDERBERG

To: Howard Goodman WHO.

OCT 1 1976

Re Science + World Health

One issue I hope to pursue in December is an effort to produce a vehicle for broader awareness of scientific challenges in world health (slightly broader than topical medicine but embracing this!)

So I have been sustaining this dialogue with Noel.

Short of the Ford Science effort we should encourage more face-to-face confrontation of "front line soldiers" with "ivory-tower specialists"

Nevertheless the meeting that Brenner chaired was not half bad!
