Personal memo from
JOSHUA LEDERBERG

A. M. d'Angelo

JAN 31 1992

3d W interest in Bd Atoms
Continued.

I mentioned to you
SIPRI
Phys. Soc. Resp.
Pugwash. [Dr. Martin Kaplan]

An Italian chemist Zichichi has been trying to organize scientists to work against CW.

Ponnamperuma is a Sri Lankan also a professor at U. of Md., College Park Md.

Best source of perspective would be retired Ambassador James Leonard (also former director UN Association). He was US negotiator of the 1972 BW convention.

My advice: be very cautious about any agency connection to this effort. But OK to consult Kaplan, Leonard
