BW hazards

1. The real threat (both to US & USSR) is proliferation. My concern is in advertising BW to terrorists; so I hope you don't publish "how to do it".

X ...

JL 3/14/84

2. The indisputable fault in Russian behavior is their obstruction of treaty obligations for cooperative verification. Without that there will be a CBW arms special and no way to contain proliferation. The Sov's will have as much cause to regret that as we do!
