Some time ago, Gene Garfield suggested I write a "Citation Classic" on this.

Norton - your recollection on 5/16 reminded me to come back to it.

To get the ball rolling, I put up this draft. I am open to your wishes on further modulation in substance and in form.

Possibilities.

1) as is - pace any corrections of fact.

2) NDZ co sigs " ".

3) NDZ + BDD co sigs ...
[1st plural singular can be fixed up in text, as needed]

4) BDD write your own, again back to back.

all have pros, few cons.

4) would allow more room.
I suggest then moving the bit about IBC vs VACS to BDD's.

There are many interesting facets, so let's do something.

What is your pleasure?

Josh.
