Personal memo from
JOSHUA LEDERBERG

Harold Ginsberg.
P+S.

Dear Harold

MAR 14 1988

Mel Cohn's contributions to clonal selection.

Harold – Mel has done some wonderful things – but this is not one of them. He was adamantly opposed to clonal selection. His papers with Attardi were wrong and set the field back several years.

I can't imagine who wrote this up; and it does Mel no service to pretend lies about him. It's incomprehensible! *

But please have my name out of it. Just read the papers yourself, or ask Barry Bernacerraf.

Jos

I'm sure he would disapprove of the attribution!
