Professor J. Lederberg  
Department of Genetics  
Stanford University Medical School  
Palo Alto, California

Dear Joshua and Esther:

We haven't been able to make arrangements to come to Palo Alto next week so I guess we'll just have to postpone a family trip until later, perhaps in the fall.

I am not yet sure but that I won't come out before the summer is over myself to visit your laboratory and various others. I'll write regarding this before I start.

Since your visit have been having troubles with my fermentor and haven't progressed in enzyme purification as far as I would have liked. The colorimetric assay for kinase can be worked up so as to give results in about five minutes. Takes a little tinkering however.

Best wishes.

Sincerely yours,

M. L. Morse, Ph.D.  
Associate Professor  
Dept. of Biophysics
