Dr. Joshua Lederberg
Department of Genetics
Stanford University Medical School
Stanford, California 94305

Dear Dr. Lederberg:

* Trends in Biochemical Sciences is a new review and news publication of the International Union of Biochemistry that will begin publication in January. I enclose a copy of the miniature issue which is being used for promotional purposes.

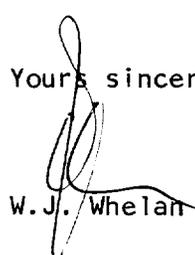

A feature of TIBS will be news of biochemists and life scientists in general, and my reason for writing to you is to ask if you would be willing to contribute an obituary notice on Dr. Edward Tatum for publication in the earliest possible issue. Something of the order of 500 words would be most welcome.

I was out of the country when Dr. Tatum died and I am approaching you rather than Dr. Beadle because I imagine he will already have been asked from more than one source for a similar contribution.

This is also an opportunity to inquire whether you have been able to take up the invitation from the organizers of the IUB Congress in Hamburg to report on the Viking mission? I know that they invited you but I did not hear anything after this.

All good wishes.

Yours sincerely,

W. J. Whelan
