DEPARTMENT OF GENETICS

March 13, 1950.

Dr. W. Stanley,  
Virus Laboratory,  
University of California.

Dear Dr. Stanley:

If any are still available, I would greatly appreciate reprints of your papers dealing with the introduction of organic radicals into TMV and the physiological and genetic effects of these substitutions. We are studying the genetic effects of alkylating agents on bacteria, with findings I should like to correlate with yours.

I would also appreciate the exchange of reprints of potential mutual interest.

Yours sincerely,

*Joshua Lederberg*

Joshua Lederberg  
Assistant Professor of Genetics
