PROFESSOR C. RIMINGTON, F.R.S.

Oct 1st, 1956.

Dear Professor Lederberg,

I enclose a set of reprints on diaminopimelic acid; there are two further papers in press which I expect will be of interest to you. I will send you copies when they are available.

We have been very interested to hear that you have produced protoplasts of E. coli with penicillin & will follow your further

work with keeness. Would you be kind enough to send us reprints on this subject.

Yours sincerely

Elizabeth Work.
