HERBERT NAGOURNEY

1/5/84

Dr. Hedenburg-

I'm adding this note in the hope that the 1983 Comtex Annual Report & Proxy Statement as well as the press release describing our association with UPI will convince that Comtex/Scientific Datalink has found its way.

We are a company with a "mission" and the machinery (i.e. dedicated staff, Jack Wiley, IHS) is in place to accomplish our goals.

I hope you can find the time - preferably lunch - to allow me to tell you more about our plans and activities.

I sincerely believe you would enjoy being on our Scientific Advisory Board.

Herb
