Dear Salve

I very much appreciated your review of McCarty in Sci. Am. and your answer to Stent!

Two minutiae —

1) propagation of Beadle's own mis-statement about the dates of Neurospora. Beadle and Tatum started in Feb 1941.

Harvey Judson has made same error.

2) Harriett Taylor was LC Dunn's student.
Dobzh would not likely have encouraged her!

All bestwishes
