Thank you Dr. Hairline.

We ~~to~~ are holding a session here on July 8. I don't think that decontamination is such a remarkably difficult problem if there's someone willing to tend to it.

It's not very likely but I hope there will not be any particular "announcement" (e.g. news in Science) of my cooption — I've been cutting loose from several other committees and wouldn't want to stress new jobs. It's no secret of course, and don't let this remark generate any troubles.

J. L.
