Nov. 3, 1947

Dear Mr. Lederberg,

I am writing in hopes that you will give me some information on the lecture which you gave this past June concerning your finding of linkage groups — and evidences of crossing-over which indicate the existence of chromosomes in bacteria. I am familiar with with the article; "Novel Genotypes in Mixed Cultures of Biochemical Mutants of Bacteria"; however I understand that your comments and lecture at Cold Harbor were of a more specific nature.

Any information which you could give me on this matter would receive my deepest appreciation.

Sincerely Yours,
C. E. Connor
