Department of Biology

Dear Josh:

There are two very fine young fellows here — both interested in Genetics. But neither graduates until the following February (1949). I'll write you about them then, if you wish, as I don't think graduate students of their potentiality often are found. Why don't we keep them here? — (1) We ain't got a graduate Genetics program yet, and (2) we encourage our graduates to go elsewhere any way. Those were two damn fine papers of yours, and I await my reprints of the Genetics & CSH papers.

Best regards — Ken
