Dr. J. Lederberg
The University of Wisconsin
College of Agriculture
Madison 6, Wisconsin

Dec. 10, 1953

Dear Dr. Lederberg,

Many thanks for your kind letter of Dec. 7. I was really delighted to know that you are going to visit our campus in the coming spring. I am looking forward to have your lecture and to see you here. While my staying in this country, I am planning to go to Madison to see you there and additionally to meet with one of my intimate friends, Dr. G. Takagi, who has been studying in your Macardle Memorial Cancer Institute. He is an assistant Prof. of the Biochemistry, Osaka Municipal Medical College and a son of our Professor Takagi, Department of Anatomy, our Osaka University Medical School, Osaka, Japan. If you are so kind to see him, I should be much grateful to you.

Our group members have always been talked highly about your University. I also have also felt great interest in several reports on Trichomonas and Trypanosoma appearing in your University. I have ~~also~~ always had high regards to his brillvant and profound works on Trichomonas factor accomplished by late Prof. Morgan, your Department.

Of Mr. Tetano Hino, I am sorry to say that I have no personal and official acquaintance with him, because I had jointed the Japanese Society of Geneticists only a few years ago. Therefore it ~~have~~ is impossible ~~to~~ for me to criticize his data and his personality. However, I can suggest you that it would be better to ask ~~you to~~ Prof. Hideo ~~Kikkawa~~ KIKKAWA, Prof. of Genetics, Dep. of Genetics, Osaka University Medical School, who will be surely much aquaintance with him.

With best wishes,

Very Sincerely yours
Shogo Inoki
