TÉL: SÉGUR 01-10

Paris March 11

Dear Josh

Tank you for your letter and your D.S. I think it's very important to have many data about pedigrees of single zygotes and I hope this will help to elucidate some K12 mysteries.

I dont still completely know the details of my travel in the States. I dont think it will possible for me to go to Madison*. I hope nevertheless to have some opportunity of meeting you if you plan to on the West Coast. Please tell me what your plans are for Summer.

Best regards to Esther and you.

Yours sincerely

François

I had just finished this letter when I received the final program of the Baltimore Symposium, and I am happy to see that you will attend it - We will therefore certainly meet in Baltimore.
