UNIVERSITY *of* WASHINGTON
SCHOOL OF MEDICINE
DEPARTMENT OF MICROBIOLOGY
SEATTLE 5

Dear Joshua,

I came through Madison near the end of August, but missed you because you were on a well earned vacation.

While at Berkeley last fall I had the class do that nice recombination experiment using 58101 and W1177. It was a great success both for the class and for me.

Yours truly

like to use the experiment in my class here. Hence, I need like to ask you for K12, 58161 and W1177, or analogous strains, together with directions.

I saw Roger Stanier the other day. He seemed to have enjoyed Paris thoroughly.

Thanks

Erling Ordal
