3-25-49

Dear Josh,

Sent of sewage under separate cover – separate because I got your letter one hour after I mailed the sewage.

A very crazy thought – Could your recombination be connected in any way with the lysogenicity?! – like the phage being the agent carrying the exchanging alleles –

No doubt the phage free strains recombine O.K.

I called Harris and am getting the Trp less from him. Thank you.

Szilard is back from the East. We have been thinking about the light reactivation effects.

Forgive the typing but my electromatic pen needs a new fuse

Aaron
