Dear Esther & Josh,

The Novicks join in a loud Bon Voyage to the Lederbergs.

We expect a detailed report (with slides) upon your return.

Many thanks for the old MS, which is amusing to read again.

We have been having the usual kind of summer here, too sticky and too inconvenient for work, yet lots of fun seeing everybody again. I am hoping to enter ~~[illegible]~~ the transduction business - if only in a peripheral way. If anything remains of it, I look forward to a chat at Thanksgiving.

Also our best to Seymour.

Happy Landings,

JADA
