SCHOOL OF MEDICINE

DEPARTMENT OF GENETICS
Professor J. Lederberg, Executive

Gaylen —

This just came in.

Many thanks. We will have to accept your very kind invitation — just now I cannot say exactly when — I will certainly keep it in mind.

Not many suggestions on your vacancies. You might investigate Seymour Ledutby (now at Brown in Biology). Joe Mandel, now at Stanford Research Institute: worked with Hershey, Delbruck. No comment on qualifications. Lou Baron would be a strong candidate; don't know whether an assoc. prof.'p would do it; Haig Papazian — probably not for your department. You have a lot of competition. Orenski (end.) has nothing to do with this inquiry.

For a somewhat fuller story on the Salter Institute for Molecular Biology, see Chem. Eng News for 7/25.

Heard an ugly rumor that there was a Berkeley jinx #5.

Best wishes to all of you & to the Kellys.

Joshua
