19 Oct. 1957

Dear Josh,

I was glad to get your letter & to hear that you were performing some fly recombination experiments. I've had a valuable & stimulating trip so far, & have now got the Harvey Lecture off my mind (last Thursday).

A few days ago I had a letter from David Walker, & arrangements are in hand for my visit to Wisconsin – which will be on Wed Thurs 20-21 Nov. Sorry that you & Esther won't be there, for I'd very much like to get your views on animal virus genetics after your exposure at the Hall Institute.

Thanks for your suggestions about people to see in Madison; I'll try to see all of these folk.

Best wishes to Esther & yourself

Frank.

If you do happen to want to write again before I get to Madison c/o Miss G. M. Woodroofe
Dept of Microbiology
5724 Ellis Ave
Chicago 37, Ill

will be my address just before I go there.

FOLD SIDES OVER AND THEN FOLD BOTTOM UP
MOISTEN FLAP WELL AND APPLY PRESSURE TO SEAL
NO OTHER ENVELOPE SHOULD BE USED
