INVESTIGATION OF
MICRONUTRIENT ELEMENTS

July 21
1959.

Dear Jack & Esther,

Tak for sidst! Det var härligt! — I am rewriting the articles (more detailles) again. Please give me reference to your work on the triple defect strains.

Cleland in Bloomington told me ~~that~~ the fall meeting (Nov 16-18) of the Nat. Academy will take place there. As a newly elected member I am expected to give a paper. Moreover, he asks me about the possibility of a Symposium. Perhaps one could have one on something like "Metabolic Markers in Bacterial Genetics." With you & Arthur Kornberg, Luria, Seymour Cohen, Hartman & Amos, Bonner & Yanofsky. Give me a better idea — I still find the title more or less meaningless.

We could also select Human Genetics – but aside from Hemoglobin there is not as yet too much to say. In a couple of years it will be better.

I could easily suggest a pure biochemical one solely on "Galactose Metabolism and its Role in Biology" (Leloir, Kalckar, Lederberg's, Novick, H. G. Wood & E. Kennedy)

Perhaps that is better altogether. Fondest greetings

Sincerely

Herm.
