AIR MAIL

UNITED STATES POSTAL CARD

THIS SIDE FOR ADDRESS

Dr Joshua Lederberg (5PM 5.8)
Genetics Department
Stanford University
Palo Alto.
California

Oregon - He is interested in Biology (Wimmin). Paul the 3d - now 6 - who was put into the Preventorium for a year is now back home - He is primarily interested in religion - in keeping with his Link fore-fathers. In your request you ask "If you still disfike the Proc which causes me to ask why you used the underlined word. I was saving those more or less useless (to me) Proceedings for you to put them to good use. But a practical man. As I wrote this it is zero. We are having an early and severe winter. I hope this finds you & Father liking Palo Alto etc. With best wishes and all good cheer. Kare Paul Link

XI-16-59 Dear Joshua: I have your
230 Am request for some back issues
of the Proc. Nat. Acad - and have asked
one of my students to see if they
are still in my office. # Though I
have been out of the ‡ San since
May 1 I have not gone to the building
But I am coming along in a
right good way - and its quite
likely that I will outlive all of
my contemporaries. # I walk
about 5 miles each day - sleep 12
hours - and doodle away the
rest of the time with nothing in
particular. Of course I think - now
and then - about the fact that Wis
has or will replace J. Hedenberg with
5 men - and 100,000 square feet of
new space. # I had intentions to
write you earlier but I didn't
know if you were on the Riviera -
bathing in Rome - or eating
Smorgesbaard in Stockholm. # Our
eldest son choose to try Cal Tech
and at present he is sweating it
out in Theoretical Physics. This
is strictly an experiment and I
would not be surprised if he
shifted to a more mundane subject
like genetics or economics. But
thats up to him. # Our second son Tom
choose to go to Reed College, Portland
