Dear Josh:

Thanks a lot for your strains. I've been able to get ~~BR~~ 12 mutants from one of them.

I'd appreciate getting new strains from you as you get them (unless I'm able to get what I want from the strains I have; in which case I'll write).

I'm getting coli from fecal samples from a local hospital. If you are interested in having any or all of these I'd be glad to send them to you.

Best regards

George.
