Monday 15/6/59.

Dear Bruce —

Just have a time to check that Pasteurella business. I may have been slightly misled — as far as was apparent in 1954 Devignat had not published anything on recombination in Pasteurella and Smith could hardly have been expected to know about this personal communication. Whether he ~~painted~~ published anything since 1954 I don't know.

It was splendid to see Jane & yourself again, and I hope again 'ere long.

J

P.S. I referred Devignat to Werner Braun & Ellis Englesberg. I wouldn't have the bug in my lab.
