Logic in Biological Thought.

Dear Dr More.
40 years ago* I was quite entranced with Wordgen/Axiomatic Method in Biology. From time to time I surface to see what may be going on in this area; and I was glad to see your name in a citation search on Wordgen & name.

Could I impose upon you for reprints of your papers, especially those that could enlarge my perspective on what is going on generally in this field.

Many thanks,

Joshua Lederberg
