Memo from
JOSHUA LEDERBERG

To: Dick Young.
NASA HQ
APR 4 - 1978

Exobiology at Rockefeller Univ.

Dick —

I have been starting some interesting discussions with Norton Zinder; and in all likelihood he will be writing up a research proposal that could also allow for the continuity of some of the ideas I expressed last year. But it may be 6 or 8 weeks before this is thought out and written. Is that soon enough for funding by say Jan. 1 1979, if approved?

Conversely, I do not think there will be any substantial residual, at most a few months, of my own work here

J
