Dear Josh:

In filing various material I found ~~your~~ the little note about your book ~~that~~ had fallen off and I hadn't seen it at first. I think it's great you are doing it. I know it will be extremely valuable.

I just wish I'd been more systematic about correspondence notes on research etc. for I now know I can't trust my memory for many important points of 20-30 years ago. We should encourage more workers to follow your example.

Best

Beets
