Sept 26

Dear Josh:

1) Betty's too busy to type the thesis. Since there is no urgency in getting it in could you get it done there?

2) Y49 in the records is derived from Y38 and requires arginine + glutamic. Two lysophil. cultures tested are instead for arginine + tyrosine! How's about it?

3) Didn't you get 2 quarts flasks - one to leave with us? It can't be found!?

Yours Ed

Hi, Esther!
