~~Oct~~ Nov 3

Dear Josh: the insides of 2 strains tested from Cyophil aren't disturbed as they used to was! viz. 453 + 410 require only leucine! Do you have OK. cultures? Hope to send mutants in C_1 soon. Also dope on our transformations — I'm glad to hear I'm subscriber to Luminar — news to me — why don't I get outlines, if so?

Dave + I think "solution" of nic. problem slight exaggeration!

No real news otherwise — thesis is in progress — regards to Esther

Yours
Ed
