BOWERS, J.

Memo/Reply From
JOSHUA LEDERBERG

TO: Dr. John Bowers
Macy Foundation

Iris Hirsch proposal

My main purpose is to offer my enthusiastic seconding to Iris's interest in working on Ehrlich. I agree with his estimate of its importance; and I believe this study will illuminate how really important breakthroughs are created and received (in better or worse fashion) by contemporary science.

Dear Hirsch

Memo/Reply From
JOSHUA LEDERBERG

TO: John

P.S.

I have recently torn a tendon in my shoulder — the superior-rotator "cuff" and must flee to the hospital (H&S) for a week or so for mechanical repairs. But once again my warm thanks for your initiative in friendly reintroductions; and I hope to see you in a reasonably short while when I get back in harness.

Yours,
John
