Barbara Bachmann

JUL - 8 1993

* Lam B deletion covered by F' plasmid

Dear Barbara

Thank you for your note on "K-12".

Is Bruce Stocker's K-12 lyophil dated? Is it derivative of my collection, or of Clifton's aboriginals?

I will certainly pass on any further gleanings I can get out of my own records.

* Do you have anything corresponding to the above? The better characterized the bounds of the deletion and of the plasmid the better. And I'd be just as happy if the stock were λ^- but that's not crucial.

Many thanks
Yours.
