Professor Joshua Lederberg  
Department of Genetics  
Stanford University  
Medical Center  
Palo Alto, California

Dear Joshua:

Please return Army Field Manuel 3-10 as I will need it within a few days.

Did you notice that Senator Case refered to your editorial in the Washington Post in advocating what he described as a non-proliferation treaty for biological weapons. I believe the Senator realizes that a non first use provision would have to be coupled with the non-proliferation treaty in order to prevent it from being a retrograde step, inasmuch as most nations of the world have already ratified the Geneva non-first use agreement.

The September 29 issue of New Scientist has an excellent article about our Stockholm venture. I'll send a Xerox copy to you when I return from Bloomington, in about a week.

Sincerely yours,

Matthew Meselson
