MAY 27 1980

Thank you!

very much for your draft + Beeson's. They were most helpful. When is " to be published?

I would enjoy scrapping with you sometime about what the dangerous misconceptions are: 1) indexes to value of personal health services vs 2) their intrinsic value vis-a-vis public health. Lacking operationalizing, how do you know? (Both alternatives are orthogonal to the value of research)..

But again, thanks!

P.S. May I have a copy of #8?

Yours,

X...
